

To experience the full potential of the Reco VR PLATFORM, users can access it across various devices, enabling seamless interaction and collaboration:

• VR Headsets

• Desktop & Laptop Computers

• Smartphones

VR Headsets: For a fully immersive virtual reality experience, placing you directly within surgical simulations, anatomical explorations, and collaborative medical scenarios.

Desktop & Laptop Computers: Providing robust access to the platform's features for detailed scenario design, content creation, and comprehensive project management.

Smartphones: Enabling connectivity and participation in the collaborative working environment, allowing for flexible access to the platform's capabilities on the go.

HARDWARE

The Reco VR PLATFORM enhances treatment outcomes through transparent patient education, provides advanced surgical training, fosters seamless expert collaboration, and elevates clinical practice with comprehensive content.
